

CB MOUNTING BRACKET INSTALLATION INSTRUCTIONS

1. Attach CB mounting bracket, not included, to CB mount using 2 # 8 screws with washers and nuts, included.
2. Follow CB mounting instructions for mounting CB to bracket.
3. Cut provided edge bumper into 2 desired lengths and position on mount edge between dash and mount. One piece behind CB mounting bracket and 2nd piece in front of bracket. See photo below.

Edge Bumper
(installed)

4. Remove 2 screws from dash side panel of Jeep.
5. Place CB mount assembly to dash.
6. Align holes in mount to holes in side of dash. Attach mount using the two 1" screws provided.
7. When using included microphone bracket plate, remove screw in dash located to the right of steering wheel below ignition switch.
8. Attach microphone bracket from CB, not included, to microphone bracket plate using the 2 # 6 machine screws and nuts supplied. If holes do not align, drill correct holes in microphone bracket plate to match microphone bracket.
9. Place microphone bracket plate to dash and align hole in plate to hole in dash. Attach plate to dash using provided #10 x 1 3/4" Phillips pan head screw.
